SUMMARY

Highly aimed, passionate, smart working 2nd year Computer Science Engineering student. I am a desperate python programmer with lots of experience in interesting python projects.

EXPERIENCE

AutoBulkmailing System

Building this project was fun. Here in this project I grabbed the list of participants from the excel sheet and send them custom html embedded emails.

AutoBulkCertification System

This project taught me how to manipulate images. In this project I grabbed the list of participants from the excel sheet, then build custom certificates sent them on the participant's email ID.

Resume Builder

This is web app developed in django. This web app takes all the necessary data for the resume and then sends the resume to the user on his/her email ID.

Manager / Volunteer

Worked as a volunteer as well as a manager in ABHIGYAN (an International Student Conference)for two consecutive years 2019/20

Volunteer

Volunteered in my departmental club ACSES.

SKILLS

Python

C

Cpp

Leadership

Team Player
